Wild boar hunting in Slovakia 2024

Procedure of the hunt and nature of the territories::

The population of wild boar in Slovakia is very good and the density of mature wild boars in our territories is extraordinarily high. Our hunting grounds are located in the central and southern parts of the country, where there has been absolutely no case of ASF so far. You start the hunt on the first night after your arrival and end your stay with the hunt on the last morning. It is up to you whether you want to stalk the black coats or hunt from the high seat. Our high seats are very well insulated, so hunting is comfortable for them even in very cold weather conditions. It is advantageous if you can bring a night vision device or a thermal imager for glazing but also for shooting. If you do not have the appropriate technology, you can also borrow it from us. . During the hunting trip you will most likely see many sows and on average we expect a total distance of 5-10 wild boar during your trip. If they want to focus exclusively on hunting strong boars, we will adjust the hunt accordingly to significantly increase the chances of mature bass. During the day, they can relax in their accommodation, gather strength for the next game walks and enjoy a delicious meal. You can also use the day for excursions and, for example, visit a nearby health resort.
